🎓 EDUCATION

University of Nigeria, Nsukka — *B.Sc. Computer Science (Ongoing)*

- **Relevant Coursework:** Object-Oriented Programming (OOP), Software Development Lifecycle (SDLC), Introduction to Data Structures, HTML, CSS, and JavaScript Basics, Frontend Web Development with React, Version Control with Git and GitHub

---

💼 EXPERIENCE

Genesys Tech Hub | Intern — *Frontend Developer*

- Collaborated on real-life projects including a Netflix clone and a telemedicine platform
- Participated in code reviews, daily standups, and sprints.
- Improved debugging, responsive design, and UI consistency.
- Technologies: React, Tailwind CSS, TypeScript, JavaScript, HTML, Vanilla CSS.

SKILLS

Technologies: JavaScript | TypeScript | React | Tailwind CSS | Vanilla CSS | HTML
OS/Tools: Mac | Windows | Git | GitHub | Vercel | Netlify | Firebase
Soft Skills: Agile | Debugging | Teamwork | Communication

PROJECTS

EightBit Casual Game Platform | gamehub-sandy-nine.vercel.app
- Translated Figma designs into responsive React components using TypeScript and CSS.
- Collaborated with backend developers to sync UI with real-time data and game logic.
- Built and styled key UI sections including landing page, game interface, and user dashboard.

The Pivot Challenge | challenge.thepivot.ng
- Collaborated closely with backend developers to connect routes and endpoints.
- Integrated backend APIs for creating, editing, and syncing notes in real time.
- Focused on responsive layout and mobile-friendly UI.

The Pivot | thepivotsite.netlify.app

- Collaborated closely with backend developers to connect routes and endpoints.
- Integrated backend APIs for creating, editing, and syncing notes in real time.
- Focused on responsive layout and mobile-friendly UI.

Netflix Clone | netflixclone-three-lime.vercel.app

- Designed and built responsive signup, login, and dashboard pages using React.
- Integrated external movie API to display dynamic content across the dashboard.
- Managed routing, state, and API calls for a smooth, app-like user experience.

Afriswap | afriswapp.netlify.app

- Collaborated with a team to design and build a cross-chain token swap platform using React.
- Implemented wallet connection (MetaMask, WalletConnect, Coinbase Wallet) and chain/network selection for seamless swapping.
- Developed responsive UI components, managed state, and integrated mock blockchain interactions to simulate real-time swaps.
